Developer(s):

Victoria University: Paul Hawking

Georgia Southern University: Adrian Gardiner

Description:

SAP BusinessObjects provides a broad range of reporting tools to facilitate decision making of the different end users. SAP's Xcelsius is one of the Business Intelligence tools available from SAP BusinessObjects which can be used to build dashboards. The following tutorial is designed to introduce students to the fundamentals of building a reporting dashboard using SAP Xcelsius. Students will create a reporting dashboard that will provide a summary of bicycle sales for each sales region for Global Bike Inc.

Developer(s):

Prasanna Rao, Cheng Huey Chen (Temasek Polytechnic, Singapore)

Course Description:

The Crystal Reports reporting course supplements the Business Intelligence course with modules using Crystal Reports 2008 and the SAP Integration Kit. Crystal Reports is the industry standard for report design and allows report designers to create pixel perfect reports.

The course comprises slides and case studies that allow the students to understand how to...

1. Plan a report
2. Create a report
3. Select and organize data in the report
4. Represent data visually
5. Create reports from SAP OLAP data sources
